Summary

🚀 **React Native Developer** with 4+ years of experience in **cross-platform mobile development, performance optimization, and API integration**. Currently **Technology Lead** at Infosys, driving efficiency in **mobile architecture, scalability, and user experience**. Expertise in **React Native, JavaScript (ES6+), TypeScript, Redux, Firebase, RESTful APIs, and Git**, with a strong focus on **state management, mobile security, and performance tuning**.

📌 Key Achievements:

- ✓ **Reduced app crashes by 35% and improved load times by 30%** through optimized architecture.
- ✓ **Refactored Redux state management**, reducing redundant code by **40%** for maintainability.
- ✓ **Automated CI/CD workflows**, cutting deployment time by **50%** with Fastlane & Bitrise.
- ✓ **Achieved 100% test coverage**, reducing post-release defects by **50%**.
- ✓ **Accelerated Agile development**, improving sprint efficiency and reducing time-to-market by **20%**.

Experience

Infosys Ltd., Gurugram

📌 Technology Lead | Senior React Native Developer *(March 2023 – Present)*

- Led the end-to-end development of a Consumer Mobile App, optimizing memory management and refining API calls, which reduced crashes by 35% and improved load speed by 30%.
- Refactored Redux-based state management, modularizing reducers and improving action efficiency, which enhanced performance and reduced redundant code by 40%.

- Integrated Google Maps API & third-party SDKs, enabling real-time location tracking and interactive features, which led to a 25% increase in session duration.
- Spearheaded unit & integration testing using Jest and React Native Testing Library, achieving 100% test coverage and reducing post-release defects by 50%.
- Automated **CI/CD pipelines (Fastlane, Bitrise, GitHub Actions)**, cutting deployment time by **50%**.

📌 **Technology Analyst | React Native Developer** *(July 2021 – March 2023)*

- Designed and developed high-performance React Native applications, optimizing bundle size and leveraging lazy loading, which reduced load times by 30%.
- Integrated RESTful APIs & Firebase, implementing real-time syncing and efficient caching mechanisms, reducing response times by 25%.
- Optimized e-commerce architecture by restructuring API calls and pre-loading critical data, enhancing checkout speeds by 20%.
- Led Agile development cycles, refining backlog grooming and sprint planning, which accelerated feature rollouts and improved sprint efficiency by 20%.

Wizlite Innovation Center, Bengaluru

📌 **React Native Developer** *(Jan 2021 – Mar 2021)*

- Developed and launched a React Native application, optimizing rendering logic and implementing virtualized lists, which improved UI responsiveness by 25%.
- Built scalable UI components using modular design principles, reducing redundant code by 30% and improving maintainability.
- Successfully deployed the Trade License App on the Google Play Store, achieving 1,000+ downloads within the first month.

🔗 [Trade License App](#)

Ramakrishna Electro Components Pvt. Ltd., Delhi

📌 **Field Application Engineer** *(Nov 2019 – Nov 2020)*

- Provided **technical consultation & circuit design optimization**, reducing system failure rates by **20%**.

- **Developed customized hardware solutions**, improving efficiency and cutting costs by **15%**.

Tiyatech Solutions Pvt. Ltd., Delhi

🔧 **Research & Development Engineer** (*Sep 2017 – Oct 2019*)

- Engineered **IoT-driven automation solutions**, enhancing **operational efficiency**.
- Developed **Servo Voltage Stabilizers** using **Atmega 16 & 32 microcontrollers**, ensuring **power stability**.

Education

📖 **B.Tech. – Electronics & Communication Engineering** (*2013 – 2017*)
Global Institute of Technology and Management, Gurugram - 74%

📖 **Senior Secondary (12th Grade) – Science (PCM)** (*2011 – 2013*)
S.R. Century Public School, Bahadurgarh, Haryana

Projects

Consumer Mobile Application (Jul 2021 – Present)

A React Native-based mobile application featuring real-time **Google Maps integration**, **e-commerce functionalities**, and **optimized UI/UX**.

- Developed and optimized **app performance**, reducing response time by **30%**.
- Improved navigation and state management using **Redux Toolkit**.
- Led **unit & integration testing**, achieving **100% test coverage**.

Trade License Application (Jan 2021 – Mar 2021)

🔗 [Play Store Link](#)

- Designed and developed a **React Native app** for **license application tracking and processing**.

- Integrated **timeline functionality** for better user experience.

Servo Voltage Stabilizer (Sep 2017 – Oct 2019)

- Developed an **Atmega 16 & 32 Microcontroller-based system** for **voltage regulation and power control**.

Additional Projects

- **Friendship Zone** (*Jan 2023 – Feb 2023*)  [GitHub](#)

- Built a **social networking project** using JavaScript, displaying a **dynamic list of friends**.

- **Auto Mobile Mechanic** (*Jan 2023 – Feb 2023*)  [GitHub](#)

- Developed a **React-based automobile service booking platform**, featuring a **product catalog and appointment system**.

- **Notes Making App** (*Feb 2023 – Apr 2023*)  [GitHub](#)

- A **React Native application** for **note management with category-based filtering**, powered by **Redux Toolkit**.

Skills

Proficient in:

- **React Native, JavaScript (ES6+), Redux, TypeScript, Firebase, RESTful APIs, Git, Agile Methodologies**

Intermediate Knowledge of:

- **Performance Optimization, Unit Testing (Jest, React Native Testing Library), CI/CD (Fastlane, Bitrise, GitHub Actions)**

Certifications

- 🏆 React JS
- 🏆 MongoDB Atlas & Connection Completion
- 🏆 Node JS

Awards & Achievements

- 🏆 3P Award – Productivity, Performance & Process Excellence (Infosys, Oct 2024)
